#### **DETAILED ACTION**

### Information Disclosure Statement

1. The information disclosure statement, filed April 20, 2004, in part, fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

The forms PTO-1449 (two sheets) and PTO-892 (one sheet), which were previously filed in parent application 09/531,692, do not include a column that provides a blank space next to each document to be considered, for the examiner's initials.

#### Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is

Application/Control Number: 10/827,349 Page 3

Art Unit: 2643

appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., In re Berg, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); In re Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); In re Van Ornum, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-18 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10, 25-34 of U.S. Patent No. 6,970,538. Although the conflicting claims are not identical, they are not patentably distinct from each other because they differ only in minor changes in wording.

For instance, claim 1 of the present application is the same as claims 25 with dependent claims 30 and 31 of the patent except claim 1 recites "said first node is connectable to at least one data unit" and claim 25 recites "each of said nodes is connectable to at least one data unit."

## Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Application/Control Number: 10/827,349 Page 4

Art Unit: 2643

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dichter (US 6,216,160) in view of Willer (US 6,522,728).

Regarding claims 14-18, Dichter discloses an apparatus (programmably configurable node 10) comprising:

- a wiring connector (node 10 connects to telephone wiring; col. 2, line 21);
- a modem (transceiver 26; col. 4, line 66);
- a telephone connector (RJ11 connector 11);
- a coupler (LPF 12 connects to the telephone line 14;
- a power consuming component (power supply 16 receiving power from the telephone line; col. 5, lines 7-13).

Dichter differs from claims 14-18 in that it does not specify a digital telephone connector. However, Willer teaches the desirability of providing ISDN telephone connection in a home network (Abstract) such that it would have been obvious to an artisan of ordinary skill to incorporate such digital telephone connection, as taught by Willer, within the apparatus of Dichter in order to allow for ISDN-based communication.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hartmann et al. show another home network with digital telephony. Bell and Ripy et al. show other relevant home networks.

Application/Control Number: 10/827,349

Art Unit: 2643

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stella L. Woo whose telephone number is (571) 272-7512. The examiner can normally be reached on Monday-Tuesday, Thursday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Curtis Kuntz can be reached on (571) 272-7499. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
